LEARNINGS AND PAIN POINTS

```
def check():  
    for i in a:  
        if i == 0 and pb2.value == 0:  
            i = 0  
            print("Out of range, but fixed it!")  
        if i == 4 and pb1.value == 0:  
            i = 3  
            print("Out of range, but fixed it!")
```
